## RECENT PROJECTS

### RedKangaroo React app:

**React.js | HTML | CSS | JavaScript | Material UI | Working in a distributed team.**

As a front-end developer at [Redkangaroo](#). I was in charge of creating the website from the ground up, the team provided me with the business requirements and the mockups. I developed the full web app, which interacts with restful endpoints, and socket connections. I also helped the team polish the requirements based on constructive feedback.

### Firefox UI improvements:

**Mercurial | HTML | CSS | JavaScript | Working in a distributed team**

As an applicant of the [Outreachy program](#), I made multiple [contributions](#) to the Firefox desktop application for the [Proton redesign](#). I was added to the [Add-on Contributor Recognition](#) list for improving the [add-ons UI](#).

### [Travis Poker Timer:](#)

**React.js | HTML | CSS3 | Semantic-ui | Git | JavaScript**

I helped the team to make the web application fully responsive, recreating the desktop design to adapt to multiple devices.

### Food Truck AppFood

**React.js | JavaScript | HTML | CSS3 | Firebase | tailwind | yarn | Git | Gatsby**

I have been working with a start-up that was creating a subscription-based Food truck app, where owners can manage products, orders, and users can place online orders.

### Card details form | [Site](#) | [Source code](#)

**Vanilla JavaScript | HTML | CSS3 | GitHub | FlexBox**

A challenge from [Frontend Mentor](#), where I received a [design](#) and [requirements](#) to create an responsive interactive card details form, which I built from scratch with just vanilla JavaScript, CSS and HTML.

**Comments app** | [Site](#) | [Source code](#)

**React.js** | **HTML** | **CSS3** | **FlexBox** |

A challenge from [Frontend Mentor](#), where I received a [design](#) and [requirements](#) to create an responsive comments app, which I built from scratch with just React.js, JavaScript CSS and HTML.

**QR Code app** | [Site](#) | [Source code](#)

**Vanilla JavaScript** | **HTML** | **CSS3** | **GitHub** | **FlexBox**

A challenge from [Frontend Mentor](#), where I received the [design](#) and [requirements](#) to create an responsive QR Code app, which I built from scratch with just vanilla Vanilla JavaScript, CSS and HTML.

**One Memory** | [Site](#) | [Source code](#)

**React** | **Firebase** | **CSS3** | **Git**

If you ever feel like you want to share your most treasured souvenirs with the world, One Memory is for you. oneMemoryApp was built using React, styled with CSS3, and uses Firebase to store data collected from the user.
